a DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 6, 9, 29 and 32, drawn to a carboxylated glycan (first product), method of making and a method of using the glycan (antibody binding assay).

Group II, claim(s) 23, drawn to a second method of using the carboxylated glycan (leukocyte binding assay).

Group III, claim(s) 33-35, drawn to drawn to antibodies (second product).

Group IV, claim(s) 53 and 54, drawn to a hybridoma cell line (third product).

Group V, claim(s) 55, drawn to drawn to a third method of using the carboxylated glycan (reducing extravasation of leukocytes).

Group VI, claim(s) 79, drawn to drawn to a fourth method of using the carboxylated glycan (reducing adherence of leukocytes to endothelial cells).

Group VII, claim(s) 88, drawn to drawn to a fifth method using the carboxylated glycan (treating inflammation).

Group VIII, claim(s) 107, drawn to drawn to a sixth method of using the carboxylated glycan (treating cancer).

The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Toomre et al (Glycobiology 4(5): 653-663 (1994)) disclose BAP-oligosaccharide conjugates containing from 1 to 4 sialic acid residues, i.e., from 1 to 4 negative charges, as required in the claims. See caption of Figure 3 on page 655, disclosing the purification of said BAP-oligosaccharide conjugates using anion exchange HPLC. Product-by-process claims 29 and 32 read on the BAP-oligosaccharide conjugates disclosed by Toomre. Toomre does not mention anything about the claimed leukocyte binding assay (group II), nor does Toomre discuss the preparation of antibodies or monoclonal antibodies or hybridomas from the BAP-oligosaccharide conjugates (groups III and IV), nor does Toomre mention generic methods of reducing extravasation or cell adherence (groups V and VI), nor does Toomre discuss the therapeutic methods recited in the claims (groups VII and VIII).

Art Unit: 1651

By disclosing the first-claimed product, without disclosing the numerous direct and indirect applications of that product claimed by applicant, Toomre demonstrates that the first-claimed product lacks a single technical feature which defines it over the prior art. Thus, the listed groups clearly lack a single inventive concept required under PCT Rule 13.1.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

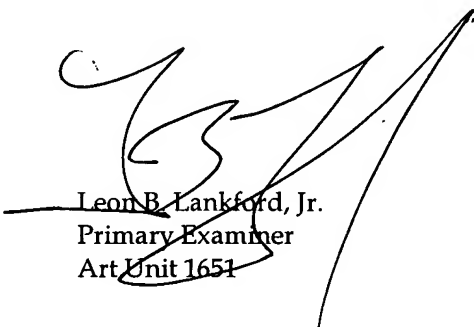

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susan Hanley whose telephone number is 571-272-2508. The examiner can normally be reached on M-F 9:00-5:30.
